Notes:

1. Hole type refers to reverse circulation drilling (RC), diamond drilling (DD) or a combination of both: RC followed by DD (RC/DD)
2. Hole sizes for diamond drilling include HQ core (6.35 cm) and NQ core (4.76 cm). The outside diameter of the RC drill hole casing is 11.43 cm.
3. Coordinate System is UTM NAD83 Zone 11. All holes were located by differential GPS survey.
4. The following holes are located in areas close to the Blue Hill deposit:
 - Holes EG-BH-11-031, EG-BH-13-032, -033, -034, and -035 are located between the Ann Mason and the Blue Hill deposits.
 - Hole EG-BH-13-040 is located 750 metres west of Blue Hill.
 - Holes EG-B-10-003 to -007 are located 0.7 to 1.4 kilometres northwest of Blue Hill.
